## EDUCATION

### IMS Engineering College, Ghaziabad

B.Tech Computer Science

May 2025

## INTERNSHIP/EXPERIENCE

### Web Developer Intern – Century Plywood

July 2024 – Aug 2024

- Built a web-based system to track and manage devices across different departments with details like stock, brand, expiry, and purchase date..
- Used Node.js, Express.js, and EJS to develop the application, integrating HTML, CSS, and JavaScript for an interactive interface.
- Implemented Excel file upload using Multer and XLSX, enabling automatic data grouping by department, device, and brand with advanced filtering for analysis.

### Web Development with React Trainee – Anudip Foundation

Sept 2025 – Nov 2025

- Gained hands-on knowledge of HTML, CSS, JavaScript, and React.
- Built a personal Portfolio website as part of the training program.
- Currently learning responsive design, DOM manipulation, and React components.

## PROJECTS

### ROJGARMITRA | MongoDB, Express, React, Node.js

- Implemented secure JWT authentication with Bcrypt and role-based access for students and recruiters.
- Implemented job posting, application tracking, and company profile management through RESTful APIs
- Designed scalable MVC-based backend with custom middleware to secure protected routes.

### AI IMAGE GENERATOR | HTML, CSS, JavaScript, OpenAI API

- Developed a web-based AI image generator that allows users to create high-quality images using OpenAI API.
- Built a responsive and intuitive UI for seamless interaction.
- Integrated OpenAI API for text-to-image generation.
- Optimized performance for fast image retrieval and improved user .

### GITHUB PROFILE FINDER | HTML, CSS, JavaScript, GitHub API

- Built a dynamic web application that allows users to search GitHub profiles by username and view profile details including avatar, followers, following, and repositories.
- Integrated GitHub REST API to fetch and display live data asynchronously using Fetch API and async/await.
- Implemented client-side pagination to efficiently navigate through repositories.
- Added dark/light mode toggle to enhance user experience and accessibility.

## TECHNICAL SKILLS

**Languages:** C++, HTML5, CSS3, JavaScript

**Frameworks/Libraries:** React.js, Tailwind, Bootstrap

**Databases:** MySQL, SSMS, MongoDB

**Tools:** VS Code, Git, GitHub

## ACHIEVEMENT

- Published research paper titled “A Review on Integrated Job Portal for Job Seekers and Recruiters” at NIT Jalandhar, 2025, focusing on automating job data aggregation using web scraping and real-time notifications to enhance job search efficiency.

## CERTIFICATIONS

- Cloud Computing and Big Data Internship, YBI Foundation
- Web Development Training in React, Anudip Foundation
- Employability Skills (Aptitude and Soft Skills), TCP Global 2023.

## AREAS OF INTEREST

- Full Stack Development
- Cloud Computing
