EDUCATION

IMS Engineering College, Ghaziabad   **May 2025**
B.Tech Computer Science

INTERNSHIP/EXPERIENCE

Web Developer Intern – Century Plywood   **July 2024 – Aug 2024**
- Built a web-based system to track and manage devices across different departments with details like stock, brand, expiry, and purchase date..
- Used Node.js, Express.js, and EJS to develop the application, integrating HTML, CSS, and JavaScript for an interactive interface.
- Implemented Excel file upload using Multer and XLSX, enabling automatic data grouping by department, device, and brand with advanced filtering for analysis.

Web Development with React Trainee – Anudip Foundation   **Sept 2025 – Nov 2025**
- Gained hands-on knowledge of HTML, CSS, JavaScript, and React.
- Built a personal Portfolio website as part of the training program.
- Currently learning responsive design, DOM manipulation, and React components.

PROJECTS

ROJGARMITRA | *MongoDB, Express, React, Node.js*
- Implemented secure JWT authentication with Bcrypt and role-based access for students and recruiters.
- Implemented job posting, application tracking, and company profile management through RESTful APIs
- Designed scalable MVC-based backend with custom middleware to secure protected routes.

PORTFOLIO | *HTML, CSS, JavaScript*
- Designed and developed responsive, user-friendly web interfaces using HTML, CSS, and JavaScript
- Integrated a contact form using Formspree to enable users to connect directly through the website.
- Implemented interactive UI elements and animations to enhance user engagement and overall experience.

GITHUB PROFILE FINDER | *HTML, CSS, JavaScript, GitHub API*
- Built a dynamic web application that allows users to search GitHub profiles by username and view profile details including avatar, followers, following, and repositories.
- Integrated GitHub REST API to fetch and display live data asynchronously using Fetch API and async/await.
- Implemented client-side pagination to efficiently navigate through repositories.
- Added dark/light mode toggle to enhance user experience and accessibility.

TECHNICAL SKILLS

Languages: C++, HTML5, CSS3, JavaScript
Frameworks/Libraries: React.js,Tailwind, Bootstrap
Databases: Microsoft SQL Server (SSMS,T-SQL), MySQL, MongoDB
Tools: VS Code, Git, GitHub

ACHIEVEMENT

- Published research paper titled "A Review on Integrated Job Portal for Job Seekers and Recruiters" at NIT Jalandhar, 2025, focusing on automating job data aggregation using web scraping and real-time notifications to enhance job search efficiency.

CERTIFICATIONS

Microsoft SQL Certification Training – Intellipaat.

Cloud Computing and Big Data Internship, YBI Foundation

Web Development Training in React, Anudip Foundation

AREAS OF INTEREST

- Full Stack Development
